

## TABLE OF CONTENTS

	Page
ABSTRACT IN THAI.....	I
ABSTRACT IN ENGLISH.....	III
ACKNOWLEDGEMENT.....	V
TABLE OF CONTENTS.....	VI
LIST OF TABLES.....	IX
LIST OF FIGURES.....	X
LIST OF ABBREVIATIONS.....	XII
 <b>CHAPTER</b>	
<b>I      INTRODUCTION.....</b>	<b>1</b>
1.1    Background and significance.....	1
1.2    Research objectives.....	2
1.3    Research hypothesis.....	2
1.4    Scope and limitations of the study.....	3
1.5    Research methodology.....	3
1.5.1    Instrumentation.....	3
1.5.2    Location of research.....	3
<b>II     LITERATURE REVIEW.....</b>	<b>4</b>
2.1    Somatic cell nuclear transfer (SCNT).....	4
2.2    Low efficiency of cloning underlie incomplete epigenetic reprogramming.....	4
2.2.1    DNA methylation.....	5
2.2.2    Histone modification.....	5
2.2.2.1    Histone acetylation.....	6
2.2.2.2    Histone methylation.....	6
2.3    Small molecules for enhancing the development of cloned embryos by ameliorating epigenetic reprogramming.....	7
2.3.1    Reversine.....	7
2.3.2    SAHA.....	8
2.4    Beneficial application of cloning in pig.....	9

## TABLE OF CONTENTS (Continued)

	Page
2.4.1 Agricultural applications.....	9
2.4.1.1 Enhanced livestock traits.....	9
2.4.1.2 Disease resistance.....	9
2.4.1.1 Genetic preservation.....	10
2.4.2 Biomedical applications.....	10
<b>III MATERIALS AND METHODS.....</b>	<b>11</b>
3.1 Chemicals.....	11
3.2 Ethic statement.....	11
3.3 Experimental design.....	11
3.4 Donor cells preparation.....	12
3.5 Oocytes collection and IVM.....	12
3.6 Somatic cell nuclear transfer (SCNT) and Activation.....	13
3.7 <i>In vitro</i> culture (IVC).....	14
3.8 SAHA and Reversine treatments.....	15
3.8.1 Opimization of the optimal concentrations of Reversine and SAHA.....	15
3.8.2 Opimization of the optimal durations of Reversine and SAHA.....	15
3.9 Total cell number assay.....	15
3.10 <i>In vitro</i> fertilization (IVF) and IVC.....	15
3.11 Effect of Reversine and SAHA on development and epigenetic reprogramming of porcine cloned embryos.....	16
3.1 Evaluation of the levels of gene expression by qPCR.....	16
3.2 Evaluation of the levels of protein expression by ICC.....	18
3.2 Statistical Analysis.....	19
<b>IV RESULTS.....</b>	<b>20</b>
4.1 Effects of Reversine and SAHA on developmental competence.....	20
4.1.1 Effect of Reversine on developmental competence.....	20
4.1.2 Effect of SAHA on developmental competence.....	21

## TABLE OF CONTENTS (Continued)

	Page
4.2 Effects of Reversine and SAHA on the gene expression by qPCR.....	23
4.2.1 Evaluation effects of Reversine on on the levels of and development epigenetic reprogramming.....	23
4.2.1.1 Effect of Reversine treatment on development.....	23
4.2.1.2 Effect of of Reversine treatment on histone acetylation.....	24
4.2.1.3 Effect of of Reversine treatment on DNA methylation...	25
4.2.2 Evaluation effects of SAHA on on the levels of development and epigenetic reprogramming.....	26
4.2.2.1 Effect of SAHA treatment on development.....	26
4.2.2.2 Effect of of SAHA treatment on histone acetylation.....	27
4.2.2.3 Effect of of SAHA treatment on DNA methylation.....	28
4.3 Effects of Reversine and SAHA on the protein expression by ICC.....	35
4.3.1 Evaluation of Reversine on the levels of epigenetic reprograming.....	35
4.3.1.1 Effect of Reversine treatment on histone acetylation.....	35
4.3.1.2 Effect of Reversine treatment on histone methylation...	36
4.3.1.3 Effect of Reversine treatment on DNA methylation.....	36
4.3.2 Evaluation of SAHA on the levels of epigenetic reprograming.....	36
4.3.2.1 Effect of SAHA treatment on histone acetylation.....	37
4.3.2.2 Effect of SAHA treatment on histone methylation.....	37
4.3.2.3 Effect of SAHA treatment on DNA methylation.....	38
<b>V DISCUSSION AND CONCLUSION.....</b>	<b>47</b>
5.1 Discussion.....	47
5.2 Conclusions.....	56
REFERENCES.....	58
APPENDICES.....	75
BIOGRAPHY.....	80

## LITS OF TABLE

Table	Page
3.1 Primer sequences used for qPCR analysis.....	17
3.2 List of primary antibody and dilution used for ICC analysis.....	19
4.1.1 Effects of different concentrations of Reversine treatment on developmental competence porcine SCNT embryos for 12 h.....	20
4.1.2 Effects of different durations with 1 $\mu$ M of Reversine treatment on developmental competence of porcine SCNT embryos.....	21
4.1.3 Effects of different concentration of SAHA treatment on developmental competence of porcine SCNT embryos for 12 h.....	22
4.1.4 Effects of different durations with 1 $\mu$ M of SAHA treatment developmental competence of porcine SCNT embryos.....	22

## LITS OF FIGURES

Figure	Page
3.1 Representative image of cumulusoocyte complexes (COCs).....	13
3.1 Representative image of metaphase II (MII) oocyte.....	14
4.1 Representative images of embryos at blastocyst stage and nucleic staining.....	23
4.2 Comparison of mRNA expression levels of genes related to developmental competence (Reversine treatment) .....	29
4.3 Comparison of mRNA expression levels of genes related to histone acetylation (Reversine treatment).....	30
4.4 Comparison of mRNA expression levels of genes related to DNA methylation (Reversine treatment).....	31
4.5 Comparison of mRNA expression levels of genes related to developmental competence (SAHA treatment) .....	32
4.6 Comparison of mRNA expression levels of genes related to histone acetylation (SAHA treatment).....	33
4.7 Comparison of mRNA expression levels of genes related to DNA methylation (SAHA treatment).....	34
4.8 Effect of Reversine on the histone acetylation level (H3K9ac).....	39
4.9 Effect of Reversine on the histone acetylation level (H3K14ac).....	40
4.10 Effect of Reversine on the histone methylation level (H3K9me3).....	41
4.11 Effect of Reversine on the global DNA methylation level (5-mC).....	42
4.11 Effect of SAHA on the histone acetylation level (H3K9ac).....	43
4.13 Effect of SAHA on the histone acetylation level (H3K14ac).....	44
4.14 Effect of SAHA on the histone methylation level (H3K9me3).....	45
4.15 Effect of SAHA on the global DNA methylation level (5-mC).....	46
