ABSTRACT IN THAI	I
ABSTRACT IN ENGLISH	III
ACKNOWLEDGEMENT	V
CONTENTS	VII
LIST OF TABLES	XIII
LIST OF FIGURES	XVI
LIST OF ABBREVIATIONS	XVII
CHAPTER	
I INTRODUCTION	1
1.1 Introduction	1
1.2 Research objectives	4
1.3 Research hypotheses	4
1.4 Scope of the study	4
1.5 Expected benefits	5
1.6 References	5
II LITERATURE REVIEWS	9
2.1 Carbohydrate and protein	9
2.2 Carbohydrate metabolism pathways	12
2.3 Carbohydrate utilization in fish	14
2.4 Nutritional programming	15
2.5 Nutritional programming of dietary carbohydrate on fish	16
2.5.1 Nutritional programming of dietary carbohydrate on fish early stage	16
2.5.2 Nutritional programming of dietary carbohydrate on broodstock zebrafish	17
2.6 Epigenetic modifications	19

CONTENTS (Continued)

	Page
2.6.1 Main research contents of epigenetics.....	19
2.6.1.1 DNA methylation.....	19
2.6.1.2 Histone modifications	19
2.6.1.3 Non-coding RNA	20
2.6.2 The role of epigenetic modifications in glucose metabolism	21
2.6.3 The role of epigenetic modifications in lipid metabolism	21
2.6.3.1 DNA methylation and lipid metabolism	22
2.6.3.2 Histone modification and lipid metabolism.....	22
2.6.3.3 Non-coding RNA and lipid metabolism.....	22
2.7 Effect of dietary high carbohydrate on fish epigenetics modification.....	23
2.8 References	26
III HIGH CARBOHYDRATE FEEDING IN NILE TILAPIA BROODSTOCK AFFECTS METABOLISM AND EPIGENETICS OF JUVENILE OFFSPRING	32
3.1 Abstract	32
3.2 Introduction	33
3.3 Materials and methods	35
3.3.1 Ethics statement	35
3.3.2 Experimental diet, design, and fish culture.....	35
3.3.3 Fish sampling	37
3.3.4 Blood chemistry analysis.....	37
3.3.5 Chemical composition, glycogen and triglycerides.....	38
3.3.6 Total RNA extraction, cDNA synthesis, and real-time RT-PCR analysis of genes.....	39
3.3.7 Statistical analysis	40
3.4 Results	40

CONTENTS (Continued)

	Page
3.4.1 Effects of dietary HC in broodstock on growth performance In juvenile offspring.....	40
3.4.2 Effects of dietary HC in broodstock on intermediary glucose and its related metabolism in juvenile offspring	40
3.4.3 Effects of dietary HC in broodstock on intermediary glucose and its related metabolism in juvenile offspring when they were challenged with HC diet	41
3.4.4 Effects of the HC diet in broodstock on epigenetic modifications in juvenile offspring after the HC/LP diet challenge.....	42
3.5 Discussion.....	43
3.5.1 Effects of dietary HC stimulus in broodstock on growth performance in juvenile offspring.....	43
3.5.2 Effects of dietary HC stimulus in broodstock on intermediary glucose and its related metabolism in offspring persisted to juvenile stage.....	44
3.5.3 Effects of dietary HC stimulus in broodstock on intermediary glucose and its related metabolism in juvenile offspring after challenged HC/LP diet	45
3.5.4 Effects of dietary HC stimulus in broodstock on epigenetic modifications in juvenile offspring	47
3.6 Conclusion	48
3.7 References	58
IV HIGH CARBOHYDRATE FEEDING IN NILE TILAPIA BROODSTOCK INDUCES LONG-TERM NUTRITIONAL PROGRAMMING IN ADULT NILE TILAPIA OFFSPRING	63
4.1 Abstract	63
4.2 Introduction	64

CONTENTS (Continued)

	Page
4.3 Materials and methods	66
4.3.1 Ethics statement	66
4.3.2 Experimental diet, plan, and fish management	66
4.3.3 Fish sampling	67
4.3.4 Blood chemistry analysis.....	68
4.3.5 Chemical composition, glycogen and triglycerides analysis.....	68
4.3.6 Total RNA extraction, cDNA synthesis, and real-time RT-PCR analysis of genes.....	69
4.3.7 Statistical analysis	70
4.4 Results	70
4.4.1 Effects of the HC Diet in Broodstock on Growth Performance in Adult Offspring Before and After the HC/LP Diet Challenge	70
4.4.2 Effects of the HC Diet in Broodstock on Intermediary Carbohydrate (CHO) Metabolism in Adult Offspring Before and After the HC/LP Diet Challenge.....	71
4.4.3 Effects of the HC Diet in Broodstock on Epigenetic Modifications in Adult Offspring After the HC/LP Diet Challenge	72
4.5 Discussion.....	73
4.5.1 Dietary HC in broodstock improved the growth performance of adult offspring when challenged with an HC diet.....	73
4.5.2 Dietary HC in broodstock influenced intermediary carbohydrate (CHO) metabolism in offspring throughout the adult stage, with stronger effects observed when the offspring were challenged with a dietary HC regimen.....	74

CONTENTS (Continued)

	Page
4.5.3 Dietary HC in broodstock influenced epigenetic modifications in adult offspring, particularly when challenged with a dietary HC diet	76
4.6 Conclusion	78
4.7 References	89
V Application of the nutritional programming of high carbohydrate feeding Nile tilapia broodstock in harvestable adult offspring	94
5.1 Abstract	94
5.2 Introduction	95
5.3 Materials and methods	97
5.3.1 Ethics statement	97
5.3.2 Experimental diet, plan, and fish management	97
5.3.3 Fish sampling	98
5.3.4 Blood chemistry analysis.....	99
5.3.5 Chemical composition, glycogen and triglycerides analysis.....	99
5.3.6 Total RNA extraction, cDNA synthesis, and real-time RT-PCR analysis of genes.....	99
5.3.7 Statistical analysis	101
5.4 Results	101
5.4.1 Growth performance of harvestable adult offspring fed with commercial diets and after challenged with high plant-based diets.....	101
5.4.2 Dietary HC in broodstock effect on intermediary CHO metabolism in harvestable adult offspring fed with commercial diets.....	102
5.4.3 Intermediary CHO metabolism of harvestable adult offspring after challenged with high plant-based diets.....	102

CONTENTS (Continued)

	Page
5.4.4 mRNA levels of enzymes related to DNA methylation, histone methylation and acetylation of harvestable adult offspring fed with commercial diets and after challenged with high plant-based diets	103
5.5 Discussion.....	105
5.5.1 Dietary HC in broodstock improved the growth performance of adult offspring when challenged with an HC diet.....	105
5.5.2 Dietary HC in broodstock persisted long-term effect on intermediary CHO metabolism in harvestable adult offspring.....	106
5.5.3 Broodstock NP history modulated the intermediary CHO metabolism in harvestable adult offspring after challenged with plant-based MC and HC diet	107
5.5.4 Broodstock NP history regulated the mRNA level of enzymes related to DNA methylation and histone modifications in harvestable adult offspring after challenged with plant-based MC and HC diet	110
5.6 Conclusion	112
5.7 References	129
VI OVERALL CONCLUSION AND IMPLICATION.....	133
6.1 Overall conclusion	133
6.2 Implication	136
BIOGRAPHY.....	137
