

ACKNOWLEDGEMENTS

I would like to express my sincere thanks to my thesis advisor, Assoc. Prof. Dr. Jirawat Yongsawadigul, for kindly accepting me as his graduate student, his invaluable help, excellent advice and constant encouragement throughout the course of this research. I am really grateful for his guidance and supervision during this lengthy process. My thesis would not have been accomplished and completed without his great assistance.

I would also like to thank my thesis committee members, Asst. Prof. Dr. Ratchadaporn Oonsivilai, Dr. Patcharin Siringan, Asst. Prof. Dr. Supawan Thawornchinsombut and Assoc. Prof. Dr. Visit Vaosoongnern for their invaluable comments and suggestion on my thesis.

Furthermore, I would like to thank Suranaree University of Technology for granting a scholarship, SUT-PhD Scholarship Program (SUT-PhD/03/2556) and providing me with the research facilities means to complete this doctoral thesis. I especially thank to Dr. Yanling Hua for her kindness and excellent training on headspace solid phase microextraction coupled with gas chromatography and mass spectrometry studies.

Thanks to all members of JY group and all the people at School of Food Technology during my Ph.D. study at Suranaree University of Technology for all their friendship, help and for provide an excellent working atmosphere.

Last but not least I would like to thank my family for loving me, supporting me, encouraging me, for their endless patience and for always being there for me. I love you all and without you, my study would not have been accomplished.

Wilaiwan Karbsri
