ABSTRACT (THAI)	I
ABSTRACT (ENGLISH)	III
ACKNOWLEDGEMENT	V
TABLE OF CONTENTS	VI
LIST OF TABLES	IX
LIST OF FIGURES	X
LIST OF ABBREVIATIONS	XIII
CHAPTER	
I INTRODUCTION.....	1
1.1 Background and Problem	1
1.2 Research hypotheses.....	8
1.3 Research objectives	8
1.4 Scope and limitations of the study	8
1.5 Contribution.....	9
1.6 Conceptual Framework.....	11
1.7 Expected results	12
II LITERATURE REVIEWS.....	13
2.1 Capsaicin.....	13
2.1.1 Structure of Capsaicin.....	13
2.1.2 The molecular targets of capsaicin	14
2.1.3 The pharmacokinetics of capsaicin	15
2.1.4 The roles of capsaicin in pain relief.....	16
2.1.5 The advantages therapy of capsaicin	19
2.1.6 Translating <i>in vitro</i> to <i>in vivo</i> studies into clinical trials.....	21
2.2 General Pain	26
2.2.1 The definition of Pain	26
2.2.2 Etymology.....	28

2.2.3 The mechanism of pain and pain pathways	32
2.2.4 Pain management.....	36
2.3 Capsaicin: Mechanisms of Pain Modulation and Cellular Responses in Human Dermal Fibroblasts.....	38
2.3.1 Anti-Inflammatory and Effects on Human Dermal Fibroblasts (HDFs)	40
2.4 Transdermal drug delivery systems.....	45
2.4.1 A Brief Review of Skin Structure.....	48
2.4.2 Drug absorption via the skin	51
2.4.3 <i>In vitro</i> skin permeation by Strat-M™ membranes	53
2.4.4 Strat-M™ membranes.....	56
2.4.5 Advantages of Transdermal drug delivery system (TDDS).....	58
2.4.6 Disadvantages of Transdermal drug delivery system (TDDS).....	60
2.4.7 Limitation of Transdermal drug delivery system (TDDS)	61
2.5. Electrospinning.....	63
2.5.1 Nanofibers Patch.....	65
2.5.2 Advantages of nanotechnology	67
2.5.3 Nanotechnology as therapeutic agents	69
2.6 Related work and study summary.....	74
2.6.1 Clinical trials	74
2.6.2 Related work and study summary	75
III RESEARCH METHODOLOGY.....	80
3.1 Study design	80
3.2 Study area.....	80
3.3 Materials and methods	80
3.3.1 Materials.....	80
3.3.2. Methods	82
3.4 Ethical statement	92
3.5 Research plan.....	93
IV RESULTS AND DISCUSSION.....	94
4.1 Results	95
4.1.1 The Fabrication of CAP/PVA/PVP Nanofibers.....	95

4.1.2 Physicochemical Characterizations	97
4.1.3 Surface Morphology Characterizations (SEM)	99
4.1.4 Cytotoxicity assay	101
4.1.5 Investigation of Cyclooxygenase-2 (COX-2) Inhibitory Activity for Analgesic Properties	103
4.1.6 High-performance liquid chromatography (HPLC) analysis	107
4.1.7 The <i>in vitro</i> skin permeation.....	113
4.2 Discussion.....	117
CHAPTER V CONCLUSION AND RECOMMENDATION	127
5.1 Conclusion	127
5.1.1 Fabrication of CAP/PVA/PVP Nanofibers	127
5.1.2 Physicochemical Characterization (FT-IR Analysis)	127
5.1.3 Surface Morphology (SEM Analysis)	127
5.1.4 Cytotoxicity Evaluation (MTT Assay)	128
5.1.5 Anti-inflammatory Activity (COX-2 Gene Expression).....	128
5.2 Future work.....	132
References.....	133
APPENDIX A SUPPLEMENTARY DATA	155
APPENDIX B FTIR MICROSCOPY ANALYSIS: FTIR IMAGING AND SPECTRAL MAPPING...	158
APPENDIX C ETHICAL APPROVAL	172
APPENDIX D INTERNATIONAL PUBLICATION	175
APPENDIX E INTERNATIONAL CONFERENCE.....	177
APPENDIX F PATENT	180
CURRICULUM VITAE	182

LIST OF TABLES

Table	Page
2.1 Therapeutic applications and trials of topical capsaicin for treating pain.....	24
2.2 The three main categories of chronic pain: nociceptive, neuro pathic, and nociplastic	30
2.3 Comparisons of Capsaicin Studies on Human Dermal Fibroblasts and Pain	43
2.4 Electrospinning Nanofibers for transdermal drug delivery.....	71
3.1 Research plan	93
4.1 Experimental design and testing workflow for evaluation of capsaicin-loaded nanofiber patch.....	94

LIST OF FIGURES

Figure	Page
2.1 Chemical structure depiction the structure of capsaicin	14
2.2 The mechanism of capsaicin and pain.....	17
2.3 The mechanism of pain.....	35
2.4 The World Health Organization (WHO) pain relief ladder	36
2.5 Nanoparticle skin penetration illustration	47
2.6 Mechanisms for transdermal medication administration	53
2.7 Nanofibers electrospinning process	65
3.1 Schematic representation of the electrospinning process used to fabricate CAP/PVA/PVP nanofibers.....	83
3.2 FTIR characterization workflow of capsaicin-loaded PVA/PVP nanofiber patch....	84
3.3 Workflow of SEM sample preparation and imaging of electrospun nanofiber patches were prepared for SEM observation by first cutting into square sections (1 × 1 cm ²).....	84
3.4 Evaluation of Anti-inflammatory Activity on Human Dermal Fibroblasts (HDFs) Using the MTT Assay	86
3.5 Cox-2 Inhibition assay	87
3.6 Schematic Representation of Capsaicin Permeation Study Using the Franz Diffusion Cell System.....	88
3.7 High-Performance Liquid Chromatography (HPLC) Setup and Analytical Procedure for Capsaicin Quantification.....	90
3.8 Schematic Representation of Strat-M™ Membrane Preparation and FTIR Imaging Workflow.....	91
4.1 Schematic representation of the electrospinning process used to fabricate CAP/PVA/PVP nanofibers.....	97
4.2 FT-IR spectrum and chemical formula of polyvinyl alcohol (A), polyvinylpyrrolidone (B), capsaicin (C), and nanofibers patch (D).....	99

LIST OF FIGURES (Continued)

Figure	Page
4.3 SEM micrographs of capsaicin-loaded nanofiber patch and skin interface	100
4.4 Surface morphology of nanofibers.....	101
4.5 Human dermal fibroblasts (HDF) cells treatment with nanofiber patch Using the MTT Assay	103
4.6 Evaluation of Anti-inflammatory Activity in HDF Cells by Real-Time PCR Targeting Two Genes (<i>GAPDH</i> and <i>COX-2</i>).....	105
4.7 Morphological Observation of HDF Cells After Treatment with H ₂ O ₂ and Capsaicin-Loaded Nanofiber Patch	106
4.8 The standard calibration curve of capsaicin analyzed by HPLC.....	108
4.9 HPLC Chromatogram at 1 Hours Showing Capsaicin Retention Time.....	109
4.10 HPLC Chromatogram at 2 Hours Showing Capsaicin Retention Time.....	109
4.11 HPLC Chromatogram at 4 Hours Showing Capsaicin Retention Time.....	109
4.12 HPLC Chromatogram at 6 Hours Showing Capsaicin Retention Time.....	110
4.13 HPLC Chromatogram at 8 Hours Showing Capsaicin Retention Time.....	110
4.14 HPLC Chromatogram at 12 Hours Showing Capsaicin Retention Time.....	110
4.15 Cumulative Permeation of Capsaicin Through Strat-M™ Membrane.....	111
4.16 Permeability coefficient (K_p) of capsaicin from nanofiber patch over 12-hour transdermal diffusion	112
4.17 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane.....	114
4.18 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane at Various Time Points (1 hr) in Franz Diffusion Cell System	115
4.19 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane at Various Time Points (2 hr) in Franz Diffusion Cell System	115
4.20 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane at Various Time Points (4 hr) in Franz Diffusion Cell System	115
4.21 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane at Various Time Points (6 hr) in Franz Diffusion Cell System	116

LIST OF FIGURES (Continued)

Figure	Page
4.22 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane at Various Time Points (8 hr) in Franz Diffusion Cell System	116
4.23 FTIR Imaging and Spectral Mapping of Strat-M™ Membrane at Various Time Points (12 hr) in Franz Diffusion Cell System	116

LIST OF ABBREVIATIONS

°C	=	Degrees Celsius
CAP	=	Capsaicin
cm	=	Centimeter
cm ² .	=	Square centimeters
cm ⁻¹	=	Reciprocal centimeters
TRPV1	=	Transient receptor potential vanilloid 1
DW	=	Distilled Water
FTIR	=	Fourier transform infrared spectroscopy
H ₂ O ₂	=	Hydrogen peroxide
HDFs	=	Human dermal fibroblasts
HPLC	=	High-performance liquid chromatography
IL-1 β	=	Interleukin-1 beta, lipopolysaccharide
mL	=	milliliter
nm	=	Nanometers
mM	=	Millimolar
MAPK	=	Mitogen-activated protein kinase
NF- κ B	=	Nuclear factor kappa-light-chain-enhancer of activated B cells
TDDS	=	Transdermal drug delivery systems
PVA	=	Polyvinyl alcohol
PVP	=	Polyvinylpyrrolidone
SEM	=	scanning electron microscopy SEM
μ L	=	Microliter
μ g/mL	=	Micrograms per milliliter
w/v	=	weight/volume
