

ACKNOWLEDGEMENTS

First and foremost, I have to thank my esteemed supervisor Assoc. Prof. Dr. Kaemwich Jantama for opportunity, invaluable advice, continuous support, guidance, construction comments, and encouragement during my PhD degree.

I would like to thank the Thailand Research Fund (TRF) under the Royal Golden Jubilee PhD scholarship (Grant No. PHD/0017/2560) from the National Research Council of Thailand that provided a financial support for my PhD degree. I'd also like to thank Dr. Panwana Khunnonkwao and Dr. Chotika Gosalawit for their great assistance, training, and encouragement during my experimental study. I would like to thank all the members in the team of Metabolic Engineering. It is their kind help and support that have made my study and life in the School of Biotechnology, SUT a wonderful time.

Finally, I would like to express my gratitude to my family. Without their tremendous love, understanding and encouragement after all this time, it would be impossible for me to complete my PhD degree.

Chutchawan Phosriran
