

ACKNOWLEDGEMENT

I gratefully acknowledge the financial support provided by the Office of Research and Graduate Studies (OROG), without which this study would not have been possible.

First and foremost, I would like to express my sincere gratitude to Assistant Professor Dr. Chatsirin Nakharuthai, my thesis advisor, for her valuable guidance, encouragement, and continuous support throughout my research.

I am deeply thankful to my co-advisor, Assistant Professor Dr. Papungkorn Sangsawad, as well as Associate Professor Dr. Pakpoom Boonchuen, Associate Professor Dr. Surintorn Boonanuntanasarn and for their invaluable advice, insightful feedback, and expertise that helped refine and strengthen this thesis.

I am very grateful to my advisory committee members: Associate Professor. Dr. Nopadon Pirarat, Associate Professor. Dr. Amonrat Molee from the Institute of Agriculture Technology, Suranaree University of Technology, for their constructive comments, beneficial suggestions, and productive advice regarding my research.

I would also like to thank the CN Lab team, especially Ms. Jiravadee Kaewda Mr. Sirawich Limkul and Mr. Pichitpon Luasiri for assisting with sample collection and providing essential support during the experimental work.

My gratitude also goes to Mr. Sunai Plaimee, staff member of the Fisheries Group at the University Farm, and my fellow graduate students at the Institute of Agricultural Technology. Thank you for your helpful input and technical assistance.

Lastly, I wish to express my heartfelt thanks to my beloved parents, brother, and friends. Your unwavering love, encouragement, and understanding have been a constant source of strength throughout my academic journey.

Pimpisut Manassila
