

## ACKNOWLEDGEMENTS

My deepest gratitude goes to everyone who has contributed to the successful completion of this thesis. First and foremost, sincere thanks go to my thesis advisor, Asst. Prof. Dr. Jessada Tanthanuch, for his unwavering support, insightful guidance, and invaluable advice throughout this academic journey. His expertise played a crucial role in shaping both the direction of this research and my development in academic writing and presentation skills. His dedication and mentorship have been invaluable.

Thanks are also due to my co-advisor, Dr. Amornrat Suriyawichitseranee, for her continuous support and constructive feedback. Her thoughtful suggestions on both the structure and content of this thesis, along with her encouragement during the research process, were key in bringing this work to fruition. Without her contributions, this work would not have been possible.

Gratitude is extended to the School of Mathematical Sciences and Geoinformatics at the Institute of Science, Suranaree University of Technology (SUT), for creating an intellectually stimulating environment that greatly fostered my academic growth. The knowledge and experience gained here have been fundamental to my research endeavors. Appreciation is also extended to my friends and colleagues, whose support and camaraderie throughout this academic pursuit made the journey both rewarding and memorable.

Finally, heartfelt thanks to Suranaree University of Technology for awarding me the Kittibandit Scholarship, which provided the financial support necessary for my doctoral studies. This scholarship played a pivotal role in allowing me to dedicate myself to my research and academic goals.
