ACKNOWLEDGEMENT

The completion of my work would not have been possible without the participation and assistance of many individuals whose names may not all be mentioned. Their contributions are sincerely appreciated and acknowledged.

First and foremost, I would like to express my heartfelt gratitude to my thesis advisor, Assistant Professor Dr. Rattanaporn Kasemsri, for her invaluable suggestions at every step of the research process, as well as for enhancing my academic and research knowledge.

I am also deeply thankful to Professor Dr. Vatanavongs Ratanavaraha and Associate Professor Dr. Sajjakaj Jomnonkwao for their supervision and insightful recommendations that greatly contributed to the success of my research. Special thanks go to Ms. Piyatida Punharach, Secretary of Transportation Engineering, for her assistance in coordinating various documents throughout my study. I would also like to extend my gratitude to Suranaree University of Technology for providing my doctoral scholarship, and to the Suranaree University of Technology Research and Development Fund for supporting my data collection and research expenses.

Furthermore, I am sincerely grateful to the State Railway of Thailand for providing valuable information for this study and granting permission to access railway stations across the country for data collection. I also wish to thank the staff at Thailand's border checkpoints for their cooperation in facilitating the survey process. My appreciation also goes to all survey respondents whose participation contributed significantly to the findings of this study.

Finally, I would like to express my deepest thanks to my parents, whose unconditional love and unwavering support for my education have continuously inspired and empowered me to achieve success in my life.
