TABLE OF CONTENTS II
LIST OF TABLES VI
LIST OF FIGURES VII
LIST OF ABBREVIATIONS VIII
CHAPTER

I INTRODUCTION 1

1.1 Rationale of the Research 1
1.1.1 Background 1
1.1.2 Context of Railway Route Inequality in Thailand 1
1.1.3 Belt and Road Initiative 2
1.2 Purposes of the Research 3
1.3 Scopes of the Research 4
1.4 Research Questions 5
1.5 Contributions of the Research 5
1.6 Organization of the Research 5
1.7 References 6

II ASSESSMENT OF DISPARITY IN ACCESSING RAILWAY STATIONS IN THAILAND: AN APPLICATION GEOGRAPHIC INFORMATION SYSTEM NETWORK ANALYSIS 9

2.1 Abstract 9
2.2 Introduction 10
2.3 Methods and Materials 14
2.3.1 Methodology 14
2.3.2 Spatial Distributional Analysis of Railway Station 15

TABLE OF CONTENTS (Continued)

Page

2.3.3 Spatial Accessibility Estimation 16
2.3.4 Railway Station Disparity Assessment 16
2.3.5 Study Area 16
2.3.6 Collected Data 18
2.4 Results and Discussion 20
2.4.1 Spatial Distributional Analysis of Railway Stations 21
2.4.2 Spatial Accessibility Estimation 25
2.4.3 Railway Station Disparity Assessment 28
2.5 Conclusions 35
2.6 References 37

III MEASUREMENT MODEL FOR DETERMINING THE DISPARITY FACTORS OF INTERCITY RAILWAY TRANSPORTATION 43

3.1 Abstract 43
3.2 Introduction 44
3.3 Literature Review 47
3.3.1 Cultural inequality 48
3.3.2 Spatial inequality 49
3.3.3 Social inequality 49
3.3.4 Political inequality 49
3.3.5 Knowledge inequality 49
3.3.6 Economic inequality 50
3.3.7 Environmental inequality 50
3.4 Research methodology 52
3.4.1 Research Framework 52
3.4.2 Questionnaire Structure 53
3.4.3 Participants and Data Collection 54
3.4.4 Analysis Methodology 56

TABLE OF CONTENTS (Continued)

Page

3.5 Results 56
3.5.1 Descriptive statistics 56
3.5.2 The Exploratory factor analysis 60
3.5.3 Theoretical Confirmation 62
3.6 Discussion 66
3.7 Conclusions, Implications, and Research Limitations 74
3.8 References 75

IV A STRUCTURAL EQUATION MODEL OF THE FACTORS AFFECTING THE BELT AND ROAD INITIATIVE (BRI) ON THE PERCEIVED BENEFITS AND INTENTION OF THAI PEOPLE TO USE THE CHINA-LAOS HIGH-SPEED RAIL SERVICE 86

4.1 Abstract 86
4.2 Introduction 87
4.3 Literature Review 90
4.3.1 Theory of Planned Behavior (TPB) 90
4.3.2 Perception 91
4.3.3 BRI Impact Factors 92
4.4 Research methodology 94
4.4.1 Research Conceptual Framework 95
4.4.2 Development of the Questionnaire 97
4.4.3 Participants and Data Collection 98
4.4.4 Statistical Method 100
4.5 Results 101
4.5.1 Descriptive statistics 101
4.5.2 The Exploratory Factor Analysis 109
4.5.3 Confirmatory Factor Analysis Results 109
4.5.4 Structural Equation Modeling Results 115
4.6 Discussion 117

TABLE OF CONTENTS (Continued)

Page

4.6.1 Factors perceptions of the benefits of BRI 117
4.6.2 The Relationship Between the Impacts of BRI and Perception of Benefits 117
4.6.3 The Relationship Between Perception of Benefits and Attitudes 120
4.6.4 The Relationship Between Perception of Benefits and Intention to Use Services Using the Theory of Planned Behavior (TPB) ... 120
4.6.5 Recommendation for implementation 121
4.7 Conclusions 124
4.8 Reference 126

V CONCLUSION AND RECOMMENDATION 134

5.1 Summary of the first objective 137
5.2 Summary of the second objective 138
5.3 Summary of the third objective 139
5.4 Limitations and Recommendations 140

APPENDIX A List of Publications 143
BIOGRAPHY 145

LIST OF TABLES

Table **Page**

2.1 Collected data for the study 18
2.2 Statistics data of the study area 21
2.3 Accessibility depends on the approximate area and population in accessing the nearest railway station within a certain time frame 27
2.4 Ranking of accessibility for each district based on the distance and travel time to the nearest railway station 29
2.5 Descriptive statistics analysis 31
2.6 Improving accessibility through public transportation connections to the nearest railway station within a certain time frame 32
3.1 Summarizes the previous studies on factors related to inequality 51
3.2 Participant Demographics 55
3.3 Statistical summary: Mean, Standard deviation, Skewness and Kurtosis 57
3.4 Factor analysis results of Exploratory factor analysis 60
3.5 Model results of Confirmatory factor analysis 63
4.1 Summary of previous studies on factors affecting the BRI 92
4.2 Characteristics of respondents. 99
4.3 Statistical summary 102
4.4 Factor analysis results. 110
4.5 Hypothesis results (SEM). 116

LIST OF FIGURES

Figure **Page**

2.1 Flowchart of the methodology of the study 15
2.2 Location of study area. 17
2.3 Spatial distribution of railway stations and population in the study area, Nakhon Ratchasima 20
2.4 Spatial distribution of railway stations and population density within 22
2.5 Actual passenger volumes and expected demand for railway station use in the study area 23
2.6 Railway service frequencies in the study area 25
2.7 Closest distance to access railway stations in the study area 26
2.8 Assessing railway station accessibility in the study area using the existing road network 28
2.9 Approaches to using regular bus services to connect railway station accessibility in the study area 32
3.1 Railway Routes in Thailand 45
3.2 Framework of Factors Influencing Inequality 48
3.3 Research procedure 53
3.4 Results of the second–order Confirmatory factor analysis model 66
4.1 Research Process 95
4.2 Conceptualization of the proposed model 97
4.3 SEM Model Results. 117
5.1 Overall Summary of Thesis Findings 137

LIST OF ABBREVIATIONS

α	=	Statistically significant level
β	=	Structural coefficient
χ^2	=	Chi-square
df	=	Degree of freedom
RMSEA	=	Root mean square of approximation
SRMR	=	Standardized root mean residual
CFI	=	Comparative fit index
TLI	=	Tucker Lewis Index
EFA	=	Exploratory factor analysis
CFA	=	Confirmatory factor analysis
SEM	=	Structural equation modeling
CR	=	Composite reliability
AVE	=	Average variance extracted
SD	=	Standard deviation
SK	=	Skewness
KU	=	Kurtosis
