

LIST OF FIGURES

Figure	Page
2.1 Snakeskin gourami (<i>Trichopodus pectoralis</i>).....	11
2.2 Schematic illustration of direct and indirect feminization strategies for monosex female production in fish.....	15
2.3 Schematic illustration of direct and indirect masculinization strategies for monosex male production in fish.....	20
3.1 Histological characterization of juvenile and adult gonads in snakeskin gourami	35
3.2 Validation of sex-associated SNPs at the RNA level by Sanger sequencing in snakeskin gourami.....	35
3.3 PACE genotyping analysis of nine SNPs using cDNA in snakeskin gourami	35
3.4 Validation of sex-specific SNPs in gDNA in snakeskin gourami using Sanger sequencing	35
3.5 PACE genotyping of nine SNPs using gDNA from snakeskin gourami.....	35
3.6 Expression levels of <i>adar</i> in juvenile and adult snakeskin gourami	35
3.7 T7EI heteroduplex cleavage assay of three SNP-containing loci (SNP_19, SNP_20, and SNP_21) in snakeskin gourami	35
4.1 Experimental plan for MT-induced neomale production in snakeskin gourami	35
4.2 Identification of sexual genotypes at SNP_19 and SNP_20 in broodstock using Sanger sequencing.....	35
4.3 Identification of sexual genotypes at SNP_21 in broodstock using Sanger sequencing	35
4.4 Genotypic validation of sex-specific SNPs (SNP_19, SNP_20, and SNP_21) in broodstock using PACE assays	35

LIST OF FIGURES (Continued)

Figure	Page
4.5 Histological and squash-based characterization of gonadal development in progeny derived from neomale experiments in snakeskin gourami	35
4.6 Segregation analysis of sex-specific SNPs (SNP_19, SNP_20, and SNP_21) in progeny using PACE assays	35
5.1 Experimental plan for E2-induced neofemale production in snakeskin gourami	35
5.2 Identification of sexual genotypes at SNP_19 and SNP_20 in broodstock using Sanger sequencing.....	35
5.3 Identification of sexual genotypes at SNP_21 in broodstock using Sanger sequencing	35
5.4 Histological and squash-based characterization of gonadal development in progeny derived from neofemale experiments in snakeskin gourami	35
5.5 Identification of control males and supermales based on sex-specific SNP markers (SNP_19 and SNP_20) using Sanger sequencing	35
5.6 Identification of control male and supermale genotypes using the sex-specific SNP marker SNP_21 by Sanger sequencing	35
5.7 Histological and squash-based characterization of gonadal development in progeny derived from supermale experiments in snakeskin gouramiects.....	35
6.1 Conclusion map	35
