

LIST OF TABLES

Table	Page
2.1 Taxonomy of the snakeskin gourami (<i>Trichopodus pectoralis</i>).....	8
2.2 Sex determination systems and identification approaches in teleosts.....	11
2.3 Sex-specific molecular markers identified in teleost fishes using sequencing-based approaches	14
3.1 Sex-associated transcriptome-based SNPs in juvenile and adult snakeskin gourami.....	33
3.2 Primers used for validating sex-specific SNP markers	35
3.3 Morphometric and gonadal characteristics of the independent validation cohort.....	41
3.4 Validated sex-associated SNPs and their differential expression in gonadal tissues of juvenile and adult snakeskin gourami	47
3.5 Validation of sex specific SNPs in different fish populations.....	51
4.1 Sequences of primers used for Sanger sequencing and PACE Genotyping.....	76
4.2 Number of control male and MT-treated male broodstock that were used for progeny testing	77
4.3 Sex ratio and zootechnical characteristics of progeny produced from control females crossed with control males, MT-treated males, and MT-treated neomales	85
5.1 Sequences of primers used for Sanger sequencing	105
5.2 Number of control male and E2-treated female broodstock that were used for progeny testing	107
5.3 Sex ratio and body measurements of progeny derived from control, E2-treated female, neofemale broodstock.....	113
5.4 Number of control male broodstock and neofemale-derived supermale broodstock used in progeny testing	114

LIST OF TABLES (Continued)

Table	Page
5.5 Sex ratio and body measurements of progeny derived from control, supermale broodstock	119
